- **Surface:** .003 Aluminum Laminate
- **PEX/PERT:** 3/8" Nominal
- **Groove Depth:** 1/2"
- **Tube Spacing:** 8" OC
- **Weight:** 2.5 lb/sq. ft.; 13.4 lb/board
- **Board Mix:** 62% Straight. 38% End Combo.
- **Pallet Size:** 4' x 4' x 32" Full.
- **Pallet Capacity:** 99 Boards per Full Pallet
- **Packaging:** Corner Protected. Shrink Wrapped.

ThermalBoard is a modular radiant panel system constructed from high-density MDF and laminated with aluminum sheeting for maximum conductivity and efficiency. Panels are lightweight and low profile, making installation fast and easy.

Since 2000, ThermalBoard has been trusted by contractors and architects across North America for its performance, sustainability, and ease of installation. Its design supports a wide range of flooring types and building requirements for efficient radiant heating.
